

# Програма

18.03.2022 г. начало 14:00

№	Докторант	Тема	Час
1.	Емилия Пардо	Parallel implementation of the Needleman-Wunch algorithm using graphic accelerators	14:00
2.	Милка Куцева	Energy Consumption Prediction by Using Machine Learning for Smart Home	14:15
3.	Вельо Василев	New Algorithms And Work Models For Intelligent Assistant Agents in a High-Risk Environment	14:30
4.	Веселка Петрова-Димитрова	Classifications of intelligence agents and their applications	14:45
5.	Антоний Петров	Algorithms and Programs development to Ensure Production System operation with Network Communication	15:00
6.	Катя Маджарова	Artificial intelligence systems	15:15
<b>Кафе пауза</b>			15:30
7.	Георги Искров	Research And Implementation Of Blockchain-Based Network Security	16:00
8.	Теодора Мечева	Road traffic model setup	16:15
9.	Радослав Фурнаджиев	A survey of methods and architectures for deployment and testing of containerized microservices	16:30
10.	Стефан Лишев	System with Remote and Mobile Access for Automation of Thermal Fields and Fluid Streams Measurements	16:45
11.	Йордан Генов	Highly Valid Computations in Bio-Nano Structures Computer Simulations	17:00
12.	Стефан Стоянов	Secure heterogeneous architecture	17:15
<b>Дискусии</b>			17:30
