

DESCRIPTION OF THE COURSE

Name of the course: Mathematics I	Code: MAT11	Semester: I
Type of teaching: Lectures (L) Tutorials (T)	Hours per semester: L – 45 hours T – 30 hours	Number of credits: 8

LECTURER(S):

Assist. Prof. Albena Pavlova, PhD (FME) , tel.: 32 659 678, mail: albena_pavlova@tu-plovdiv.bg,

Assist. Radoslava Terzieva (FME), tel.: 032 659 679, e-mail: radoslavaterzieva@tu-plovdiv.bg
Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curriculum for training of students to obtain Bachelor's degree, specialty “Automation, Information and Control Systems”, “Electrical Engineering”, “Design and programming of electronic systems” Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: Familiarization of students with basic questions in linear and Higher algebra, analytic geometry in the plane and three-dimensional space, the mathematical analysis necessary for application disciplines and subsequent mathematical disciplines.

DESCRIPTION OF THE COURSE: Main topics: Polynomials, actions with polynomials, of zeros of polynomials. Horner's rule and applications. Rational functions. Decomposition of fractional rational function of the sum of elementary fractions. Determinants – properties and to be somewhere. Minori and cofactor. Laplace theorem. Matrices, operations with matrices, elementary transformations, rank, inverse matrix, matrix equations. Curves from 2nd degree: circle, ellipse, parabola, hyperbola. Remarkable curves. Surfaces from 2nd degree. Familiarization of students with basic mathematical analysis questions: Limit, continuity, derivative and a differential of a function, the study of functions and applications. An indefinite integral, definite integral, Newton-Leibniz formula for calculation. Improper integrals. Series, function series and Fourier series..

PREREQUISITES: Good training in mathematics from high school.

TEACHING METHODS: Lectures and Seminars.

METHOD OF ASSESSMENT: Written examination.

INSTRUCTION LANGUAGE: Bulgarian

DESCRIPTION OF THE COURSE

Name of the course: Physics	Code: PHY02	Semester: 1
Type of teaching: Lectures (L) Laboratory work (LW) Tutorials (T)	Hours per semester: L – 30 hours T – 30 hours LW – 15 hours	Number of credits: 8

LECTURER(S):

Asst.prof. Georgi Dobrev , PhD (FME), tel.: 0886346154, e-mail: dobrevbg@tu-plovdiv.bg
Assoc. Prof. Zara Kasapeteva (FME), tel.: 032659973, e-mail: zarra_andreeva@abv.bg
Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialties “Electrical Engineering”, “Design and programming of electronic systems” and “Automation, Information and Control Systems”, Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: The aim of the course of Physics is to acquaint the students with the physical phenomena and processes, the methods of their studying and the possibilities for their technical application. The obtained theoretical knowledge and practical skills are a prerequisite for development and formation of independent thinking and ability to solve a variety of real physical problems.

DESCRIPTION OF THE COURSE: The topics, included in the course of Physics comprise basic physical laws and values, describing the most general properties of matter from the point of view of classical mechanics. The content of the course is organized in the following chapters: Mechanics, Molecular physics, Thermodynamics, Electrostatics, Electric current, Electromagnetism, Vibrations, Waves in an elastic medium, Acoustics, Geometric and wave optics, Quantum properties of matter, Atomic physics. The main physical laws are considered by means of using classical models, allowing for accurate description of real processes. Computer technique along with information technologies are used where needed in combination with appropriate measurement devices. The use of the international measurement system SI is indispensable and compulsory part of the course. The basic knowledge given by this course is further needed both for the specialized courses and for the professional preparation of the students.

PREREQUISITES: Prerequisites for successful mastering the material in the course of Physics - are good knowledge of the material in Physics and Mathematics from secondary school and certain elements from the courses in Mathematics (Calculus).

TEACHING METHODS: Lectures for acquaintance with the theoretical material, laboratory work for obtaining practical skills, as well as for systematization and processing of the measurement results. The seminary exercises help to apply theoretical knowledge to solve specific tasks (only for students majoring in Mechatronics).

METHOD OF ASSESSMENT: Written examination (test), complex assessment made up of 80% from the test result and 20% from the performance during laboratory work and seminar exercises.

DESCRIPTION OF THE COURSE

Name of the course: Chemistry	Code: CHE02	Semester: 1
Type of teaching: Lectures (L) Laboratory work (LW)	Hours per semester: L – 15 hours LW – 30 hours	Number of credits: 5

LECTURER(S):

Assoc. Prof. Ivalina Petrova, PhD (FME), tel.: 032 659 671, e-mail: ivalinapetrova@tu-plovdiv.bg

Assist. Prof. Kalina Kamarska, PhD (FME), tel.: 032 659 672, e-mail: kamarska@tu-plovdiv.bg

Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialties “Electrical Engineering”, “Design and programming of electronic systems” and “Automation, Information and Control Systems”, Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: To give basic knowledge about construction materials - metals, their alloys, polymers and other composites, by showing the relationship between the chemical composition, structure and properties. To study general regularities in the electrochemical and chemical conduct of metals in relation to the corrosion problem and its resolve. To provide theoretical and technological knowledge of basic chemical and electrochemical processes used in aircraft industry.

DESCRIPTION OF THE COURSE: The main chemical and physical properties of metals are discussed. Theoretical knowledge of electrochemical systems – electrode, electrolytic cell and galvanic cell are given. Students learn the theory of electrode potential and electrolysis processes, the kinetics of electrode reactions, and electrode over potential. Presented are the modern electrochemical sources of electric power (primary cells, batteries and fuel cells). An essential part of the course focuses on the mechanisms of corrosion processes and factors affecting their conduct, and the main methods and technologies for corrosion protection. This includes the basic knowledge of polymers - polymerization and polycondensation products, elastomers and inorganic polymers. The chemical composition, structure and properties of composite materials based on them – plastics, rubber composites, technical ceramics and cermets are studied.

PREREQUISITES: The knowledge of chemistry from the secondary school.

TEACHING METHODS: Lectures and laboratory works with protocols..

METHOD OF ASSESSMENT: Written exam.

DESCRIPTION OF THE COURSE

Name of the course: Engineering Graphics	Code: ENG06	Semester: 1
Type of teaching: Lectures (L) Laboratory work (LW) Course work (CW)	Hours per semester: L – 15 hours LW – 45 hours	Number of credits: 6

LECTURER(S):

Assoc. Prof. Eng. Pavlinka Kacarova, PhD (MIE), tel.: 659 636, e-mail: kacarova@tu-plovdiv.bg
Technical University of Sofia, branch Plovdiv

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialties “Automation, Information and Control Systems”, “Electrical Engineering”, “Design and programming of electronic systems”, Professional orientation 5.2 Electrical engineering, electronics and automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: The Engineering Graphics course aims to develop students' spatial thinking and technical culture. It provides the necessary minimum of knowledge in reading the images of electrical products in technical drawings. The student acquires knowledge and skills by making drawings and text documents of the products in compliance with all important requirements of the standards in this field.

DESCRIPTION OF THE COURSE: The main topics concern: Basic positions of the graphical representation of geometric objects on a plane. Types of design. Monge design. Representation of a point, line and plane. Mutual position of geometric objects. Transformation of projections. Depiction of lines, surfaces and bodies. Plain sections. Intersection of surfaces and bodies. Axonometric design. Standardization of graphic information. Technical drawings. Basic graphic symbols in electrical circuits. Methods for displaying details and assembled units are covered. The principles and methods of geometric and functional sizing of the products are considered. Students will acquire skills for developing and reading a drawing of an electrical product, as well as for the implementation of the basic documents of a set of design documentation. More in-depth skills are created for the application of the current CAD systems in the automated execution of a detailed and assembled drawing of a set of documentation.

PREREQUISITES Knowledge and methods are used in the discipline "Mathematics" on the basis of which methods are developed for solving problems in the field of applied geometry and engineering graphics.

TEACHING METHODS: Lectures, using slides, case studies, laboratory and course work in the field of applied geometry are solved.

METHOD OF ASSESSMENT: Current assessment of course work.

COURSE STATUS IN THE CURRICULUM: Compulsory course in the curricula for training of students to obtain Bachelor's degree, specialties “Electrical Engineering”, “Design and programming of electronic systems” and “Automation, Information and Control Systems”, Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences .

COURSE OBJECTIVES: The course is targeted at further developing of students’ language knowledge and practical skills in their specific professional field.

COURSE DESCRIPTION: The course is taught at language levels determined through placement tests, based on the principal foreign language studied at secondary school. No absolute beginner groups are formed. The course focuses on the further development of the four language skills in the domain of the students’ major subject *Electronicd*.

PREREQUISITES: The minimum of language knowledge and skills acquired at secondary school.

TEACHING METHODS: Seminars targeted at further development of the four language skills through individual and team work using audio and video, as well as multimedia.

METHOD OF ASSESSMENT: Evaluation is based on continuous assessment and students get a grade at the end of the semester.

LANGUAGE OF INSTRUCTION: English

LITERATURE RECOMMENDED:

1. *English for Electronics, Oxford University Press*
2. *Technical English, Pearson Longman*

DESCRIPTION OF THE COURSE

Name of the course: Sport	Code: SPR01	Semester: 1
Type of teaching: Lectures (L) Laboratory work (LW)/ Tutorials (T) Self-Study (SS)	Hours per semester: L – 0 hours T – 0 hours SS – 30 hours	Number of credits: 1

LECTURER(S):

Sen. Lect. Daniel Vladimirov, PhD (FEA), tel.: 032 659 646, e-mail: danielv@tu-plovdiv.bg

Sen. Lect. Petar Doganov, PhD (FEA), tel.: 032 659 648, e-mail: pdoganov@tu-plovdiv.bg

Sen. Lect. Boris Spasov, PhD (FEA), tel.: 032 659 647, e-mail: boris_spasov@tu-plovdiv.bg

Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialty “Automation, Information and Control Systems”, “Electrical Engineering”, “Design and programming of electronic systems” Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: Targeted at further developing of students' physical activities, skills and hygiene habits through effective methods of physical education, improving their mental and physical performance.

DESCRIPTION OF THE COURSE: The knowledge and skills in Physical Education and Sports develop a wide range of motor skills and habits, help the hardening of the body and contribute to the moral development of students. The enhancement of physical skills is carried out through:

1. General Physical Preparedness (GPP) – in these seminars the students develop a wide range of motor skill and habits; work to improve strength, speed, endurance, flexibility, structure and skill; increase resistance to unfavourable environmental factors; develop their physical qualities and experience.
2. Sports-Specific Physical Preparedness (SPP) – students improve their sport skills and habits in a specific sport and gain experience through participation in competitions; work to improve strength, speed, endurance, flexibility, structure and skill; increase resistance to unfavourable environmental factors; develop their physical qualities and experience.

PREREQUISITES: The curricula presume the minimum of knowledge and skills acquired at secondary school.

TEACHING METHODS: Seminars in accordance with the curriculum in PE and Sport.

METHOD OF ASSESSMENT: Evaluation is based on functional tests at the end of semester. Lecturer's signature is required at the end of semester and “Pass grade”.

INSTRUCTION LANGUAGE: Bulgarian

DESCRIPTION OF THE COURSE

Name of the course: Mathematics II	Code: MAT21	Semester: II
Type of teaching: Lectures (L) Tutorials (T)	Hours per semester: L – 45 hours T – 30 hours	Number of credits: 7

LECTURER(S):

Assist. Prof. Radka Koleva, PhD (FME), tel.: 032 659 681, e-mail: rkoleva@tu-plovdiv.bg
Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialties Automation, Information and Control Systems, Electrical Engineering, Design and programming of electronic systems, Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: Familiarization the students with basic parts of the mathematical analysis and neighbour mathematical disciplines necessary for application disciplines.

DESCRIPTION OF THE COURSE: Main topics: Ordinary differential equations with separable variables. Basic types first order ODE; Linear differential equations from second and higher order with constant coefficients; Functions of two and more variables – limit of the function, partial derivatives, differential, extrema. Double, triple, linear integrals and integrals on surface. Some notions and basic theorems from the field theory. Theorems of Green, Gauss and Stokes. Theorem for the independence of the integral from the path. Series. Function of one complex variable. Cauchy-Riemann conditions (equations), conformal mapping. Integration in the complex domain – linear integral, Cauchy integral theorem, Cauchy integral formula and formula for derivatives. Classification of the isolated singularities and definition of Laurent series and residues. Theorem for the residues. Application of residues to evaluation of real integrals; Foundations of the operational calculus – Laplace transform – basic properties and theorems. Applications – solving some classes differential equations.

PREREQUISITES: Very good training in Mathematics I (MAT12).

TEACHING METHODS: Lectures and Seminars.

METHOD OF ASSESSMENT: Written examination.

INSTRUCTION LANGUAGE: Bulgarian

DESCRIPTION OF THE COURSE

Name of the course: Electrical materials	Code: EEA01	Semester: 2
Type of teaching: Lectures(L) Laboratory work (LW)	Hours per semester: L – 30 hours LW – 30 hours	Number of credits: 5

LECTURER(S):

Assoc. Prof. Eng. Marin Genchev, PhD (FEA) tel.: 032 659 512, email: marin2g@tu-plovdiv.bg;
Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialty Electrical engineering; Design and programming of electronic systems; Automation, Information and Control Engineering, Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5. Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE:The aim of the course is to introduce students to the methods and tools for measuring the characteristics of the types of electrical materials in accordance with the requirements of BDS and relevant international standards. Methods for quality control and reliability of insulation systems.

DESCRIPTION OF THE COURSE:The subject Electrical materials presents the behavior of the various types electrical engineering materials in the electrical and magnetic field and the processes taking place within them.

PREREQUISITES:The subject is based on knowledge of Physics, Chemistry and Mathematics.

TEACHING METHODS: Lectures held by the lecturer and aided by presentations. Laboratory exercises are performed under the guidance of an assistant professor. The students should compile protocols as a result of their activities during the exercises.

METHOD OF ASSESSMENT:Written exam at the end of the second semester (90%) and summarized assessment from laboratory exercises (10%).

DESCRIPTION OF THE COURSE

Name of the course: Programming 1	Code: CCE26	Semester: 2
Type of teaching: Lectures (L) Laboratory work (LW)/ Tutorials (T) Course work (CW)	Hours per semester: L – 30 hours T – 0 hours LW – 30 hours	Number of credits: 5

LECTURER(S):

Assoc. Prof. Eng. Dilyana Budakova, PhD (FEA), tel.: 965 0895587539, e-mail:
dilyana_budakova@tu-plovdiv.bg; dilyana_budakova@yahoo.com
Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialties “Automation, Information and Control Systems”, “Electrical Engineering”, “Design and programming of electronic systems”, Professional orientation 5.2 Electrical engineering, electronics and automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: The aim of the course is for students to learn and be able to apply the approaches, methods and technical means for analysis, design and programming of software applications to solve a wide range of practical tasks; to learn fundamental concepts for the use of computer systems (CS) and the operating systems and software environments common in practice; to be able to use modern technologies in programming and the means of algorithmic language for high level programming.

DESCRIPTION OF THE COURSE: The main topics concern: Introduction to computer technology. The computer system - a means of information processing. Software for computer systems - operating systems; command language; service programs - text editor, compiler, link editor, integrated environments. Setup tools. Libraries. Solve problems with the help of a computer. Algorithm. Presentation and storage of information in the computer, coding of information, symbolic and numerical data, number systems. Structural programming. Programming technology. Procedural language programming. Introduction to the programming language C. Elementary input-output operations. Standard input-output and text files. Basic management structures. Branching. Cycles. Modularity in programming. Functions. Address pointers. Compound data types. Arrays. Relationship between arrays and pointers. Address arithmetic. Character strings. Processing. Classical algorithms and their implementation. Structures, etc.

PREREQUISITES: Knowledge of mathematics.

TEACHING METHODS: Lectures, using slides, case studies, laboratory, work in teams, protocols.

METHOD OF ASSESSMENT: Two one-hour assessments at mid and end of semester (62%), laboratories (18%), course work (20).

INSTRUCTION LANGUAGE: Bulgarian

DESCRIPTION OF THE COURSE

Name of the course: Mechanics	Code: MEC22	Semester: 2
Type of teaching: Lectures (L) Tutorials (T)	Hours per semester: L – 30 hours T – 30 hours	Number of credits: 5

LECTURER(S):

Assoc. Prof. Eng. Raycho Raychev, PhD (FME), tel.: 0895581138, e-mail: rpraichev@tu-plovdiv.bg

Chief Assist. Prof. Eng. Chavdar Pashinski, PhD (FME), tel.: 0878302513, e-mail: pashinski@tu-plovdiv.bg

Technical University of Sofia, Branch Plovdiv

COURSE STATUS IN THE CURRICULUM: Compulsory facultative subject from the curriculum for training students for Bachelor's degree, specialties "Electrical Engineering" and "Automation, Information and Control Engineering", professional field 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: The course builds engineering and technical culture in students and develops knowledge and skills for independent work and engineering assessment of various types of technical problems. The seminars expand the practical knowledge and skills in the studied discipline.

DESCRIPTION OF THE COURSE: The Main topics concern: Basic concepts and objects; Forces and actions with them; kinematics of particles, mechanical system and ideal rigid body; Geometric characteristics of bodies; Determination of internal forces and sizing of bodies. Machine dynamics..

PREREQUISITES: Mathematics, Technical documentation.

TEACHING METHODS: Lectures, using slides. The seminars are presented in a classic version.

METHOD OF ASSESSMENT: Written exam at the end of the semester.

DESCRIPTION OF THE COURSE

Name of the course Technical Safety	Code: EEA02	Semester: 2
Type of teaching: Lectures and laboratory work	Hours for the semester: L– 30 hours; LW – 15 hours	Number of credits: 5

LECTURER:

Assoc. Prof. Eng. Margarita Deneva, Department of Electrical Engineering (FEA) tel.: (032) 659 759; email: deneva@tu-plovdiv.bg , Technical University of Sofia, Branch Plovdiv

Ass. Eng. Mincho Velkov, Department of Electrical Engineering (FEA) tel.: (032) 659 512; email: mincho.velkov@tu-plovdiv.bg , Technical University of Sofia, Branch Plovdiv

COURSE STATUS IN THE CURRICULUM: Compulsory course for students from the 5.2. "Electrical Engineering, Electronics and Automation", specialties Electrical Engineering, Design and Programming of Electronic Systems, Automation, information and control technology.

AIMS AND OBJECTIVES OF THE COURSE: Acquisition of basic knowledge by students on the basic requirements, methods and measures to ensure safety at work in the conditions of modern technological progress, for the analysis and assessment of risk at work; the knowledge provides the opportunity to assess, take measures to prevent risk in activities in their professional future field and adequate reaction to accidents and occupational accidents; in accordance with their needs and interests students can acquire new knowledge and opportunities in this subject area.

DESCRIPTION OF THE COURSE: The training process focuses on ensuring technical safety at work in various conditions and facilities, occupational health and safety management, workplace risk analysis and assessment, work environment factors considered in the context of current technical legislation and applicable standards. The exercises complete the topics covered in terms of practical application of the knowledge gained from lectures and self-study.

PREREQUISITES: basic knowledge in the fields of Physics, Mathematics, Chemistry, Materials Science, Electrical Engineering.

TEACHING METHODS: Lectures, delivered mainly using a multimedia projector, laboratory exercises are prepared with appropriate models and finished with protocols.

METHOD OF ASSESSMENT: Final assessment consisting of three components: a basic end-of-semester final test and one mid-semester mid-term test for the material learned so far with weights of 0.5 and 0.3, respectively, and laboratory grade of 0.2.

INSTRUCTION LANGUAGE: Bulgarian

BIBLIOGRAPHY: Literature is mainly provided by the lecturer under the form of lecture notes in electronic or printed format, selected appropriately for the topics of the lectures and exercises.

DESCRIPTION OF THE COURSE

Name of the course: Practicum	Code: PRC01	Semester: 2
Type of teaching: Lectures(L) Laboratory work (LW)/Tutorials (T) Course work (CW) Extra-audit employment (EAE)	Hours per semester: L – 0hours T– 0 hours LW – 0 hours EAE – 45 hours	Number of credits: 2

LECTURER(S):

Assist. Prof. Eng. Dimitar Yankov, PhD (FEA), tel.: 032 659 776, e-mail: d.yankov@tu-plovdiv.bg

Technical University of Sofia, branch Plovdiv

COURSE STATUS IN THE CURRICULUM: Elective subject from the curriculum of students to obtain Bachelor's degree, specialty "Design and programming of electronic systems", Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: The aim of the course is for students to acquire practical knowledge and skills for designing, programming and assembling prototype experimental modules using a hardware and software development environment. Students should familiarize themselves with the types of electronic elements such as: resistors, capacitors and diodes, the types of printed circuit boards (PCB) and the ways of placing electronic components. Students will learn various skills related to basic processes such as soldering and desoldering, assembly and disassembly, measurement and implementation of various electronic devices. Open source development systems are used (OLIMEXINO-328 development board). After completing the course, students should be able to determine basic modules of electronic products, know and use measuring devices, materials, electronic components, tools, have acquired skills to experiment with electronic devices and technological discipline when working with them; to have acquired habits and skills for teamwork.

DESCRIPTION OF THE COURSE: The discipline introduces students to modern electronic components and devices, to the technologies used in the field of electronics. Main attention is paid to technological processes and methods in the design and implementation of electronic devices. Manual and automated technological processes are studied. Knowledge and skills are mastered in the functional testing of the designed and realized device. The main types of electronic components and their technical-economic standardization are considered. Special attention is paid to working with measuring equipment. Open source development systems are studied.

PREREQUISITES: Physics, Electrical materials, Engineering graphics, Programming 1.

TEACHING METHODS: Practical exercises in the laboratories of the department.

METHOD OF ASSESSMENT: Student reporting, demonstration and defense of self-completed assignments. There is no grade for the discipline. The practice control form is "Respected".

INSTRUCTION LANGUAGE: Bulgarian

DESCRIPTION OF THE COURSE

Name of the course: Sport	Code: SPR02	Semester: 2
Type of teaching: Lectures (L) Laboratory work (LW)/ Tutorials (T) Self-Study (SS)	Hours per semester: L – 0 hours T – 0 hours SS – 30 hours	Number of credits: 1

LECTURER(S):

Sen. Lect. Daniel Vladimirov, PhD (FEA), tel.: 032 659 646, e-mail: danielv@tu-plovdiv.bg

Sen. Lect. Petar Doganov, PhD (FEA), tel.: 032 659 648, e-mail: pdoganov@tu-plovdiv.bg

Sen. Lect. Boris Spasov, PhD (FEA), tel.: 032 659 647, e-mail: boris_spasov@tu-plovdiv.bg Technical University of Sofia

COURSE STATUS IN THE CURRICULUM: Compulsory subject from the curricula for training of students to obtain Bachelor's degree, specialty “Automation, Information and Control Systems”, “Electrical Engineering”, “Design and programming of electronic systems” Professional orientation 5.2 Electrical Engineering, Electronics and Automation, Field 5 Technical Sciences.

AIMS AND OBJECTIVES OF THE COURSE: Targeted at further developing of students' physical activities, skills and hygiene habits through effective methods of physical education, improving their mental and physical performance.

DESCRIPTION OF THE COURSE: The knowledge and skills in Physical Education and Sports develop a wide range of motor skills and habits, help the hardening of the body and contribute to the moral development of students. The enhancement of physical skills is carried out through:

1. General Physical Preparedness (GPP) – in these seminars the students develop a wide range of motor skill and habits; work to improve strength, speed, endurance, flexibility, structure and skill; increase resistance to unfavourable environmental factors; develop their physical qualities and experience.
2. Sports-Specific Physical Preparedness (SPP) – students improve their sport skills and habits in a specific sport and gain experience through participation in competitions; work to improve strength, speed, endurance, flexibility, structure and skill; increase resistance to unfavourable environmental factors; develop their physical qualities and experience.

PREREQUISITES: The curricula presume the minimum of knowledge and skills acquired at secondary school.

TEACHING METHODS: Seminars in accordance with the curriculum in PE and Sport.

METHOD OF ASSESSMENT: Evaluation is based on functional tests at the end of semester. Lecturer's signature is required at the end of semester and “Pass grade”.

INSTRUCTION LANGUAGE: Bulgarian
